

# EValu8 Transport Innovations

## Innovative solutions for a sustainable future

Does your business need advice on profitably greening your vehicle fleet?

Do you want to develop a sustainable travel plan for your employees and visitors?

Do you need help securing funding for your low carbon transport projects?

Do you have a complex transport project, with many participants, that needs managing?

EValu8 Transport Innovations can help you with all of these issues, and many more. We are a not for profit organisation providing professional, technical and consultancy support to public, private and the educational sectors.

Having developed out of the University of Hertfordshire, we have a proven track record of managing and delivering projects from complex Government and EU funded programmes, to smaller scale business and strategy advice for individual organisations.

Our particular strength lies in low carbon transport, and with skills drawn from engineering, transport planning, marketing and project management, we have the expertise and dynamism to successfully deliver your project, whatever its size.

### Our services include:

- Managing large scale ERDF and Government-funded projects
- Partnership and cluster development for funding bids
- Innovation workshops and support for your organisation
- Transport and sustainable travel planning advice
- Preparing for Electric Vehicles package – help to ready your organisation or local community for the introduction of EVs and plug-in hybrid vehicles
- Workshops on EVs, infrastructure and adoption considerations
