£43 Million for EV Infrastructure

The government has announced £32 million to develop the UK's charging infrastructure.

Chargepoints at homes, on streets and at public sector sites will be supported. A further £11 million investment will maintain the UK's position at the forefront of low emission vehicle technology innovation. **Get involved** - [contact EValu8](#) for support. [Read more>](#)

UK Plug-In Sales Surge - Why?

The UK is leading the dramatic rise in sales of plug-in cars across Europe. Sales have increased by 300% compared with this time last year. Why? [Read more>](#)

Go Ultra Low Cities Shortlisted

12 UK cities have been shortlisted as part of the government's 'Go Ultra Low' City Scheme.

Up to four plans will win a share of the £35 million investment. Are you interested in developing **sustainable travel** plans and **EV take-up** for your area? EValu8 can help!
