EV Sales To Soar

A 67% increase in EV production is forecast for 2014

A report from HIS Automotive forecasts that the 2014's global production of Electric Vehicles will surpass the 44% increase seen in 2013. This means that an estimated 403,000 pure electric and hybrid vehicles will be produced. Two themes were seen as the major factors influencing this forecast...

Wireless Charging

Toyota has begun testing a wireless battery charging system.

The new technology will remove the need for cables and connectors. Drivers need simply park their vehicle in alignment with a coil which would be inserted into the ground.

Practical elements have been included within the testing, such as...

EV Event - 11 April, London

Electric Vehicles and Eco Cars: Solutions for Green Growth.

This conference reviews progress towards mainstream market acceptance of electric mobility.

In particular, it looks at the prospects for electrifying road transport and opportunities to develop complementary green technologies and business solutions for cleaner, quieter, healthier cities.

Expert panels consider what needs to be improved, what works well, and what might be transferrable. EValu8 is pleased to running the session: Significance of EV infrastructure for mainstream market. See you there!

And The Winner Is...

The winners of the eighth Cambridgeshire and Peterborough Workplace Travel Plan Awards were announced on 14 March.

There were many well deserved Step Travel winners with special congratulations to Cambridge University Hospital on winning a Distinguished Achiever certificate!

The ceremony was held alongside an Electric Vehicle event. Manufacturers and retailers of electric cars, motorbikes and cycles exhibited their electric and hybrid vehicles. The sunshine was an added bonus on the day!

Guests included Cllr Ian Bates of Cambridge City Council, pictured after his test drive of the electric BMWi3. EValu8 was also there; Russell Fenner gave an interesting talk about Electric Vehicle charging technology.

670km EV Road Trip

Robert Llewellyn takes a zero carbon electric road trip through Wales in his Nissan Leaf.

EV News reports on the 670km electric road trip.
